Access Security

Celebrating 42 Years in the Self-Storage Industry!!!

There's something to be said about **Tradition**. Here at Sentinel we are all about Tradition, Longevity and Consistency - we have been providing the Self-Storage industry with Management Software & Access Security longer than any other company. In fact, there aren't any other companies in our industry that can offer you **Total Integration**.

Family owned and operated ~ 42 years of Experience and Superior Access & Management Software products allows us to offer our customers an advantage over everyone else. One place to purchase products and one place for support. One place for everything you need to properly secure your facility. Why wouldn't you want to do everything possible to protect your investment?

In the Fall of 2016 we introduced our newest software, **PLATINUM** to the Self-Storage industry. A cloud based software that gives you more control of your facility with the flexibility to operate from anywhere in the world. Paired up with any one of our Access Security packages will give you total peace of mind.

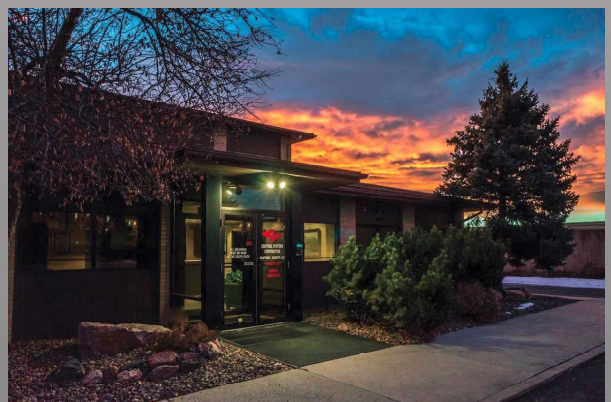

We would like to thank all of our customers for the continued support. You're the reason we push as hard as we do. Everything we do here at Sentinel is customer driven. Every time we develop a new product or introduce a new product into the industry it's for the benefit of our customers. We appreciate each and every one of you!

2017 has started out with a Bang! We anticipate this year to be even better than last year! We wish all of you Health & Happiness!

Joell Reddick-Dalton

Our rich history began over 42 years ago. In 1985 Dave Reddick was hired as Vice President in charge of Sales and Marketing at the Mini Storage Alarm Company. Dave saw a huge opportunity to provide not only security, but peace of mind to the owners and managers at these sites that they had not yet experienced. In 1988 Dave and Bonnie Reddick purchased the security and property management portion of the company, originally founded in 1975.

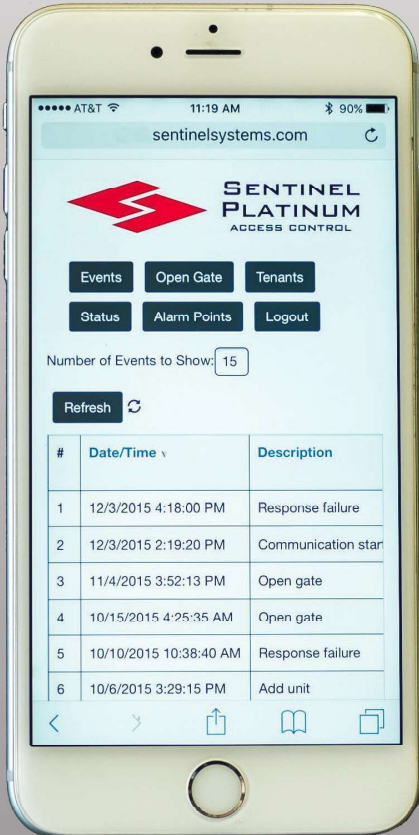

They moved it to a new location and gave it a new name. Since that day Sentinel Systems has continued to be a family owned and operated company and continues to provide the Self-Storage industry with the highest quality products offered. The Reddick family and its remarkable staff continue to be the force behind this industry leader.

Access Control

- Log into the property's access control system from any computer. Monitor property activity from multiple locations through multiple web-browsers on a single work station
- Now all network workstations can access and change information in the property's database
- Multiple communication ports are supported for additional access control systems
- Alarm and monitor building and hallway entrances
- Utilizing SQL server as the database engine
- The NEW Platinum access control runs as a Windows service, meaning no network log in is required
- Activity Alerts via text message or email
- Seamless built in integration from the ground up
- Designed for complete site operation

"Superior Interface with Platinum Property Manager"

Sentinel interfaces with StorMan and SiteLink ...and many other management software programs

3200ir Keypad

Use your Smart Phone to access the facility, pay your bill, view your account history and much more

UNATTENDED SITE SECURITY

Elevator Control & Lighting Control

Sentinel Systems' Elevator Control is designed specifically to prevent unnecessary travel in and around your property. This permits your customers limited access to only the floors they have business on — while offering your customers the highest level of security.

Our lighting control feature allows lights, or any relay controlled electrical device to be turned on and off according to tenant activity and/or time of day.
